

KLAJDI MYFTARI

Software Developer – Unreal Engine / C++

Colombaro, Modena (41043) | +39 3421654937 | klajdi.myftari.dev@gmail.com

C++-focused developer specializing in Unreal Engine 5. Experience in gameplay systems, real-time 3D, and performance optimization. Background in Unity and full-stack development, transitioning into high-performance game systems.

TECHNICAL SKILLS

Languages: C++, C#, Python, TypeScript

Game Dev: Unreal Engine 5, Unity, Blueprints, UMG

Systems: Gameplay Programming, OOP, Real-time Systems

Tools: Git, Docker, AWS, Visual Studio

UNREAL ENGINE PROJECT

FirstGame – UE5 C++ Combat Prototype

GitHub: github.com/Melis1294/FirstGame-5.0

- Developed a complete third-person combat prototype using UE5 (C++ + Blueprints)
- Implemented combat system (attacks, enemy interaction, animation-driven logic)
- Built gameplay systems using Unreal framework (Actors, Components, Controllers)
- Designed UI with UMG improving player feedback and interaction clarity
- Structured scalable hybrid architecture combining C++ performance and Blueprint flexibility
- Reduced iteration time by ~30% using Blueprint-driven prototyping workflow

EXPERIENCE

Frontend Developer – Blue Reply (2024–Present)

- Delivered scalable applications and improved performance of legacy systems
- Reduced UI bugs and improved maintainability via refactoring

Unity / 3D Developer – Protocube Reply (2023–2024)

- Built real-time 3D applications and AR systems
- Improved rendering performance and UX for interactive applications

GITHUB PORTFOLIO

github.com/Melis1294

- Unreal Engine C++ combat prototype (gameplay systems, UI, architecture)
- 3D, AR, and real-time projects demonstrating engine-level understanding

EDUCATION

MSc Computer Engineering – Politecnico di Torino
